

CS 3202 submissions – project proposal

Some comments/ instructions for project proposal writing : (1 to 2 pages)

1. Include the title of the project in the top of the document
2. Introduction to the project / Project Description
3. Importance/ usefulness of the proposed system
4. When you list objectives it should be in point form as follows (only an example):
 - The objectives of this project is to-
 - Design and implement ...
 - Provide a
 - Automate ...
5. Existing similar systems and technologies if available
6. Deliverables: (eg.)
 - A web based software system/ mobile application/ stand alone application for....
 - A GUI with
7. If you refer any data/ information you can have few references as well
8. Check spelling/ grammar and writing comprehensiveness of your proposal

Importantly: go through the instructions in the Moodle regarding any submissions.

“When you submit an assignment, name the document with your index number followed by the project title.” Do not name the document with general names (eg. cs3202 project, etc.)
